EFFECTIVE POSTER PRESENTATIONS

- When planning a poster presentation, it is useful to keep in mind the advantages of a poster over a podium presentation. Posters are available for viewing throughout the meeting and interested viewers have scheduled time for discussion, not just a few minutes.
- Carefully and completely prepare your poster well in advance of the Conference. There will not be time nor materials available for last minute preparation at the Conference. Practice setting up the poster before you leave for the Conference to determine what it will look like and to make sure that you have all of the necessary pieces.
- The title of your paper should appear at the top of your poster in CAPITAL letters. The size of the characters should be at least 2.5 cm (1") high. Below the title, place the authors' names and affiliations.
- It is important that you remember that the audience viewing your poster and listening to your presentation will be 6 feet (2 meters) from your poster. Please double-check your poster from 6 feet (2 meters) to ensure good readability.
- Use text sparingly. Use pictures, cartoons, and figures rather than text wherever possible. Bright colors will greatly enhance the attention of the viewer.
- Please be advised that audio-visual equipment will not be provided for poster presentations. You may bring your own laptop computer and run it off your battery (power will NOT be available). If you require a table please send an email request to: sgalloway@pmmiconferences.com. Tables are limited and will be assigned on a first come, first served basis.
- The flow of your poster should be from the top left to the bottom right.
- Make your poster as self-explanatory as possible, so that you will have time for in-depth technical discussions.
- The poster board will have your assigned number on it, so there is no need for you to include your number on your poster.
